### **IMPORTANT!**

**Discounted urns are urns with insignificant visual defects caused by the production process. We attach great importance to the high quality of our products, so urns with such minor defects are offered to you at an appropriately reduced price. Small visual defects are only aesthetic and do not affect the tightness, stability or proper use of the urn.**

**To be sure of your decision to buy, please read the detailed description and the photographic documentation that shows the damage in detail. If you have any further questions about the condition of your urn, please do not hesitate to contact us.**

### **Damage description**

---

***This piece has two cracks in the wood at the top near the screw cap. The damage was caused when the thread was set in. The cracks are sealed and will not get bigger. The defect is only visual, with no significance for the tightness of the urn. The thread is straight and the lid screws on smoothly to the end. The urn allows the ashes to be placed in a plastic bag to further secure the ashes. Please refer to detailed photo documentation.***
